

Christopher McGlynn

Senior UI/UX Engineer

Mead, CO | info@chrismcglynn.com | chrismcglynn.com | linkedin.com/in/christophermcglynn

SUMMARY

Senior UI/UX engineer with 10 years of building web and mobile products where design meets engineering. At Red Ventures: lifted partner-funnel conversions 56%, drove a 40% gain in landing-page conversions, cut \$144K a year in hosting costs, and built a multi-agent AI platform that takes Jira tickets to merge-ready pull requests. Expert in React, TypeScript, Next.js, design systems and accessibility. Founder of four products, from an Apple Watch app to AI SaaS.

EXPERIENCE

Senior Software Engineer

Jul 2026 – Present

Red Ventures (Ion) | Colorado (remote)

- Designed and built Quorum, an internal multi-agent AI platform that takes a Jira ticket to a merge-ready pull request (planning, implementation and code-review follow-up) with engineers approving each step in Slack.
- Routed agent work to models matched to each task's complexity to keep token spend down, and automated the review loop by resolving teammate feedback, change requests and Codex comments.
- Delivered Okta single sign-on with role-based access control across multiple tenant applications, adding one-time-passcode verification over Amazon SES.

Senior Software Engineer

Apr 2023 – Jun 2026

Red Ventures (MyMove) | Colorado (remote)

- Built a bespoke partner sales funnel on Lemonade's APIs, embedded in the USPS Change-of-Address flow, lifting conversions 56%.
- Led user research and shipped eight conversion-focused landing-page projects, driving a 40% increase in landing-page conversions and revenue.
- Led the marketing site's move from WordPress to an MDX-based stack on a one-month deadline, migrating the blog archive with a multi-agent AI pipeline and retiring Pantheon hosting to save \$144K a year.
- Led the architecture and replatforming of the USPS Change-of-Address flow, giving movers a frictionless experience and partner marketing a stronger foundation.
- Led the team's AI adoption as the go-to engineer for AI-assisted development, building the tools and workflows teammates use day to day.

Senior Software Engineer

Oct 2021 – Mar 2023

Red Ventures (Make) | North Carolina

- Led the design and development of a UI component library, simplifying both the user and the developer experience.
- Partnered with product managers on user-centered designs, from Whimsical wireframes to high-fidelity Figma interfaces, measurably improving usability.

Frontend Developer

Feb 2019 – Sep 2021

Red Ventures (Filo) | North Carolina

- Built an embeddable lead-generation chat app for partner sites, plus admin tools for state-machine chat flows, brand theming and real-time visualizations.
- Introduced MobX-State-Tree for robust, declarative state management across the codebase.

EARLIER EXPERIENCE

- Frontend Developer**, Nutrien Ag Solutions Sep 2018 – Feb 2019
React Native app for web, iOS and Android supporting agricultural commerce; HubSpot integrations through Node.js APIs.
- Software Developer**, Heartland Payment Systems Nov 2017 – Apr 2018
Angular components and iOS/Android builds for a point-of-sale application.
- Freelance UI/UX Developer**, McGlynn Enterprises, Inc. Jan 2016 – Jan 2019
Websites and e-commerce flows with Stripe and PayPal for small businesses.

PROJECTS

- NestEgg** | Founder | nesteggapp.com 2025 – Present
Investment accounts for kids that the whole family can add to — with one shareable gift link. (Next.js, TypeScript)
- MatchPoint** | Founder & developer | getmatchpointapp.com 2025 – Present
A tennis, pickleball and padel scorekeeper for Apple Watch that knows the real rules of each sport. (Swift, SwiftUI, watchOS, HealthKit)
- Retaine** | Founder | retaine.io 2025 – Present
AI-powered treatment-plan follow-up that recovers revenue dental practices have already earned. (Next.js, TypeScript, LLMs)
- Cadence** | Founder & engineer 2026 – Present
Engineering delivery analytics that joins Jira, GitHub and AI usage to show how work really flows — and whether AI spend is paying off. (Next.js, TypeScript, Jira API, GitHub API, Anthropic API)

SKILLS

- Frontend:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, Vue, Redux, MobX-State-Tree, Angular, Accessibility
- Design & UX:** Design systems, Figma, User research, Wireframing & prototyping, Usability testing, Conversion optimization
- AI:** Multi-agent orchestration, LLM application design, Prompt & context engineering, AI-assisted development, Anthropic & OpenAI APIs
- Mobile:** React Native, Swift / SwiftUI, watchOS, HealthKit
- Backend & platform:** Node.js, REST APIs, Okta SSO / RBAC, Stripe, Vercel, CI/CD, Jest, Git
- Languages:** English (native), Spanish (professional working)

EDUCATION

- Web Development Bootcamp** 2016
Galvanize — Boulder
- Computer Science** 2014 – 2017
Front Range Community College — Larimer Campus
- Business Administration, Marketing / Marketing Management** 2008 – 2012
Central Piedmont Community College
